The Shire's first Small Business Sundowner, held on Thursday 12 March, was a fantastic success, bringing together a vibrant mix of local business owners, entrepreneurs and community members for an evening of connection and conversation. With a strong turnout and a relaxed atmosphere, the event created the perfect opportunity to network, share ideas and strengthen local partnerships.

Attendees enjoyed the chance to engage directly with Councillors and Shire Executive, opening the door for meaningful discussions about what's working well across the community and where there may be opportunities for improvement. The evening highlighted the strength, passion and innovation within our local business community, and set a positive tone for future events aimed at supporting growth, collaboration and community spirit.

## **WaterSmart Farms voucher program**

The WaterSmart Farms voucher program aims to support Wheatbelt farmers in Western Australia develop fit-for-purpose water supply options suitable for a drying climate.

Round 1 is part of a research and development project to refine geophysical exploration methods for accurately locating water in bedrock aquifers (to depths of approximately 100 metres). This will help reduce drilling risks and costs for farmers in the future.

### Overview

Previous research used state exploration data and targeted geophysics (high-resolution magnetics) to identify drill targets in the bedrock. Drilling and testing yielded better results than any previous program, finding water at half of the sites where the geology was accurately mapped.

The research team now aims to further test, validate and advance this magnetic method used for targeting bedrock aquifers by partnering with farmers, who are already planning to drill for water, to test and refine groundwater exploration tools, and monitor the drill holes installed to depths of approximately 100 metres.

## *Goomalling Historical Society*

The Goomalling Museum has an interesting collection of items.

This is a branding marker, which was used to mark the skin of animals after slaughter. It has a roller mechanism used to puncture the carcass and infuse it with ink.

The tool was used at a local abattoir to mark hogget. Sheep which have lost their baby teeth, or are older than 12 months, are classed as hogget.

This information and photographs are from the WA museum website [visitwonderland.com.au](http://visitwonderland.com.au) where you can find more information about Goomalling and other small museums in WA.

The Goomalling Museum is located on Throssell Street, next to the pool and opposite Shell. The volunteers meet Tuesdays, at the museum, between 10.30am and 12 noon.

If you have any photographs, memorabilia or memories, relating to the Goomalling area, you would like to share or donate, please contact us.

If you are interested in viewing the museum, locating information or photographs of Goomalling or becoming involved in the Historical Society, please contact us.
